

21st International Conference on Software
Telecommunications and Computer Networks
SoftCOM 2013

Technically co-sponsored
by:

September 18 - 20, 2013
Split - Primošten

**International
Symposium Committee**

Chairs

*Dragan Poljak, Vesna Roje
University of Split, Croatia*

*Juraj Bartolic,
University of Zagreb, Croatia*
*Hartmut Brauer,
University of Ilmenau, Germany*
*Flavio Canavero,
Politecnico di Torino, Italy*
*Christos Christopoulos
University of Nottingham, UK*
*Elya Joffe,
KTM. Project Engineering, Izrael*
*Khalil El Khamlichi Drissi,
Polytech Clermont-Ferrand,
France*
*David Larrabee,
University of Pennsylvania, USA*
*Francesco Latarullo,
Politecnico di Bari, Italy*
*Frank Leferink,
University of Twente,
Netherlands*
*Andy Marvin
University of York, UK*
*Borivoj Modlic,
University of Zagreb, Croatia*
*Andres Peratta,
Wessex Institute of Technology,
UK*
*Farhad Rachidi,
Swiss Federal Institute of
Technology, Switzerland*
*Antonio Sarolic,
University of Split, Croatia*
*Sergey Tkatchenko,
Otto-von-Guer University of
Magdeburg, Germany*
*Algirdas Pakstas
London Metropolitan Univ., UK
a.pakstas@ieee.org*

**Symposium on
ENVIRONMENTAL ELECTROMAGNETIC
COMPATIBILITY (EEMC)**

Symposium Co-chairs: Dragan Poljak, Vesna Roje
University of Split, Croatia (dpoljak@fesb.hr, vroje@fesb.hr)

Call for Papers

Symposium on "Environmental Electromagnetic Compatibility" in the frame of the 21th International Conference on Software, Telecommunications and Computer Networks (SoftCOM 2013), will be held in Split and Primošten on September 18-20, 2013.

The rapid growth of the telecommunication industry has resulted in an increasing number of various transmitting installations, (particularly GSM and UMTS), and the related influence on human health has recently become a very hot and controversial issue.

While the message or data-handling processes and computational capabilities are necessary aspects of the mobile and wireless communication systems, the intensity and form of transmitted electromagnetic energy is of the great interest to biological researchers.

The aims of the Symposium are not only related to the modeling of natural electromagnetic interference (EMI) sources, such as lightning, and analysis and design of the protection systems (LPS), but also to the optimization of the radiation sources design by taking into account the safety aspects regarding both the human health and the quality of services (QoS).

We cordially invite speakers to present their original contributions in the area of EMC. The topics of interest include, but are not limited to:

- Sources of Electromagnetic Interference
- Antennas for Mobile Communications
- Shields for Mobile Units and other Protective Measures
- Lightning
- Grounding
- Electromagnetic Field Dosimetry
- Propagation Through Biological Media
- Biological Effects of Electromagnetic Fields
- Electromagnetic Stimulation of Human Tissue
- Electromagnetic Modeling of Human Body
- Electromagnetic Interference with Medical Devices
- Advanced Numerical Modeling

IMPORTANT DATES

Complete manuscript due	May 15, 2013
Notification of acceptance	July 05, 2013
Camera-ready manuscript	Sept. 1, 2013
